Cannabinoids

Clinical to Commercial Supply of High Purity Synthetic APIs

• Global supply chain security, from raw materials through large-scale GMP production
• Superior quality cannabidiol and dronabinol APIs with good stability profiles
• A team to help you get to market
Integrated Supply Chain Dedicated to Cannabinoids

Leveraging decades of expertise in controlled substance development, licensing and scale up, Noramco offers pharmaceutical companies a fully integrated supply chain for synthetic cannabinoid-based APIs.

- Multiple key raw material suppliers are qualified, which gives us access to reliable supplies.
- A closed-loop API production and management system ensure superior quality and stability of our products.
- API production facilities in both the United States and Europe enable us to meet your demand for large-scale commercial supply.

High Purity Synthetic Cannabidiol free of THC

Our patent-protected route to synthetic cannabidiol provides the assurance your API is free of THC.

- An excellent purity profile along with good stability allows storage at 25°C with retest dating at 18 months
- Technical package is available with US DMF filing (Third Quarter 2018)
- Large-scale GMP production available from facilities in the United Sates and Switzerland
- Reference standards available

High Purity Synthetic Dronabinol

With more than ten years of expertise in dronabinol, we are expanding our capability to better support your commercial requirements.
• 20% dronabinol in ethanol (GMP material) for clinical trials
• High purity synthetic material using existing commercial process
• Technical package available (Q2 2018)
• DMF (Q4 2018)
• Reference standards available

In Ethanol

• 20% dronabinol in sesame oil with US DMF filing (20682)
• Technical package, and open part of DMF, available today
• High-purity synthetic material with good stability profile
• Storage conditions at 5°C with retest dating at 36 months
• Reference standards available

In Sesame Oil

A Dedicated Team to Help you get to Market

Are you evaluating a range of cannabinoid analogs for therapeutic applications? Ask us how we leverage more than 30 years of expertise in controlled-substance development, licensing and scale up to help you get to market. We offer:

• Dedicated teams with the skills you require to secure cannabinoid APIs, from clinical-scale to commercialization
• Full support with DEA, FDA & other regulatory bodies (e.g.: TGA; Home Office; SwissMedic)
• International logistics team with technical and commercial presence in Europe & USA
• Long-term capacity planning with life-cycle commitment to cost reduction
• Full portfolio of API impurity and reference standards
• A range of cannabinoids and varins you may require for development and scale up, including:

Cannabinoids

Varins
The Noramco Difference
Find out how a controlled-substance supply chain development program from Noramco helps you go to market faster, with less complexity. Partner with us from the API development phase, to a pre-formulation solution, and obtain the benefits of an integrated team that support best overall outcomes.
